

## Press Sheet

### **Mobile roller cab RSC24AXXL**

#### **Sturdiness, Capacity and Safety in an Unmistakable Racing Look**

Starting from its **sturdy structure, capable of supporting up to 1,100 kg**, and the use of **high-quality materials**, all the way to its **eye-catching design inspired by the Racing world**.

This mobile roller cabinet has been designed to meet the needs of every professional, from racing departments to workshops. Thanks to a wide range of integrated accessories - such as the tool panel or PC holder - the cabinet can be **fully customized** to create an efficient, well-organized and functional workstation.

### Key Features

- **New reinforced worktop made from stainless steel coated MDF**, solid and robust, designed to support heavy loads (static load capacity up to 1,100 kg) with holes for mounting a vise.

- **Pull-out side compartment, with ball bearing slides.**
- **3 color combinations** – orange, red and anthracite – offering maximum customization and giving the roller cabinet a distinctive style.
- **Wide range of compatible accessories:** the cabinet can be fully customized to suit specific needs thanks to a variety of accessories, including a perforated tool panel, folding side shelf, pc holder, and paper roll holder.
- **8 fully removable drawers, with ball bearing slides and an anti-tilt system for maximum safety:**
  - 1 drawer: 1,176 × 367 mm
  - 7 drawers: 882 × 367 mm (6 × 70 mm high, 1 × 140 mm high)
  - Drawer bases are protected by foamed rubber mats for additional protection.
- **3 front centralized security locks to ensure safe storage.**
- **4 castors, Ø 150 mm: 2 fixed and 2 steering (one with brakes).**
