C58BC Modular Workbenches

Width, Sturdiness and Modularity to Create Your Ideal Workstation

The new **Beta C58BC modular workbench line** enables professionals to **configure their workstation** to meet their specific needs.

Thanks to a **wide range of modules and accessories**, it is possible to start from the worktop and complete the configuration with drawer units, legs, perforated tool panels and numerous accessories, creating **tailor-made solutions** for every professional environment.

The **components** of the line are **robust and reliable**, designed to withstand heavy loads of **up to 1,000 kg** and resist wear caused by intensive use.

The **75 cm worktop depth** ensures a spacious, practical and functional surface, suitable for even the most demanding tasks.

Key Features

- **Versatility:** The 75 cm deep worktop provides a spacious, practical and functional surface. Thanks to the holes for mounting a vice, it is also suitable for the most demanding applications;
- **Modularity:** The range is available in predefined combinations or can be fully customized, thanks to different options in materials, lengths and colors:
 - Drawer units – 8 undercounter modules solutions in 2 color variants
 - Worktop – available in multi-ply wood or stainless steel coated MDF, in 1.6 m or 2.1 m lengths
 - Legs – 4 types available
 - Perforated panels – kits with 2 or 4 panels
 - Accessories
- **Strength:** Supports heavy loads (up to 800 kg for the 2.1 m worktop and 1,000 kg for the 1.6 m version);
- **Capacity:** Each drawer can hold up to 4 EVA foam or ABS thermoformed trays, ensuring maximum storage flexibility.
